

Centre for Remanufacturing & Reuse

Stakeholder Workshop

January 23rd 2007, at University of Bristol

Background

Defra's BREW programme is supporting a number of pilot schemes aimed at business resource efficiency. The top-rated scheme is directed at remanufacturing, with a Year 1 remit to establish an evidence base validated by stakeholders prior to concrete interventions commencing in Year 2.

This event is a key part of the process to establish a core group of stakeholders who will assist the Centre's steering group to control the direction of its activities.

Objectives of Workshop

- Achieve a wider appreciation of the objectives of the programme amongst the business community.
- Engage business community so that they contribute to the programme and acts as ambassadors to engage others.
- Gain commitment of selected attendees to become core members to actively steer the Centre programme.
- Test out, modify and prioritise the proposed Centre objectives and forward plan for Year 2.
- Identify community members willing to engage in industrially-focussed remanufacturing projects.
- Identify international links and synergies for exploration and development.

Centre for Remanufacturing & Reuse

Stakeholder Workshop

January 23rd 2007, at University of Bristol

Agenda

The planned format of the day is:

- Welcome and introduction
- A word from our sponsors
